

# MAKE A BIRD FEEDER

**We've found that children love making these fun bird-feeders and they keep the birds coming back for more!**

## **What you will need:**

A stick (approx 30cm long, 3cm diameter)  
Bird fat mix and seeds  
String  
Drill

## **What to do:**

**Step 1:** Ask an adult to drill holes through the stick (best done with a flat wood drill bit), and a small hole at the top where the string will go to hang the feeder.

**Step 2:** Fill the holes with the fat and seed mix, this is the messy bit and best done over a bucket or bowl to catch the loose bits. Cram as much stuff into the holes as you can.

**Step 3:** Hang the feeder in the tree and watch the birds enjoy their dinner.

**Step 4:** When the feeder is empty, refill.
